

Nimra Muhammad Iqbal

Location: Bedian Road Lahore, Pakistan | nimraiqbal7071@gmail.com | +92-3263956626

PROFESSIONAL SUMMARY

Computer Science graduate with a strong foundation in Artificial Intelligence, Machine Learning, Deep Learning, and Web Development. Developed an AI-Based Prenatal Screening of Heart Holes system as a final year project and co-authored a research paper in the healthcare AI domain. Proficient in Python, React.js, HTML, CSS, Bootstrap, and MySQL, with experience in building responsive web applications and AI-powered solutions. Passionate about solving real-world problems through technology, continuous learning, and collaborative teamwork.

EDUCATION

Bachelor of Science in Computer Science(2022 – 2026)| Lahore Garrison University , Pakistan

TECHNICAL SKILLS

Programming Languages	Python, C++, Java, JavaScript(ES6)
Frontend	React.js, HTML5, CSS3, Bootstrap, Tailwind CSS,Responsive Web Design
Backend	Node.js,Python(Flask/FastAPI),RESTAPI Integration, Authentication & Form Validation
Databases	MongoDB, MYSQL
AI& Machine Learning	AI, ML, DL, Computer Vision, CNN, RNN, Medical Image Analysis,Data Preprocessing, Model Training & Evaluation
Tools&Platforms	Google Colab, Git, GitHub, VS Code, Jupyter Notebook, Postman, Microsoft Office
Web Technologies	REST APIs, JSON, Responsive UI Development
Software Engineering	OOP, Data Structures & Algorithms, Database Design, Software Development Life Cycle (SDLC), Debugging & Testing
Office Tools	Microsoft Word, Excel, PowerPoint

PROFESSIONAL EXPERIENCE

AI & Full Stack Developer | Final Year Project | BS Computer Science | 2025 – 2026

- Developed an end-to-end AI-powered healthcare web application for prenatal screening of congenital heart defects using deep learning and medical image analysis.
- Designed and implemented a full-stack system integrating a React.js frontend with a Python-based trained machine learning model for real-time prediction and result visualization.
- Performed data preprocessing, model training, and evaluation using Google Colab, improving model performance through iterative tuning.
- Built responsive and interactive UI using React.js, HTML5, CSS3, Bootstrap, and Tailwind CSS.
- Integrated MongoDB for structured storage and management of application and prediction data.

- Collaborated in a team environment using Git and GitHub for version control and project coordination.
- Followed structured development workflow including testing, debugging, and system optimization.
- Co-authored and contributed to a published research paper in the field of AI-based healthcare diagnostics. Delivered final project presentation and technical demonstration to academic panel.

PROJECTS

AI-Based Prenatal Screening System (FYP) | Python, DL, CNN, React.js, MongoDB, Google Colab

- Developed an AI-based healthcare system for detecting congenital heart defects from prenatal ultrasound images.
- Trained and evaluated deep learning models using Python and Google Colab.
- Performed data preprocessing, feature extraction, and model optimization for improved accuracy.
- Integrated trained AI model into a React.js web application for real-time prediction results.
- Designed a responsive user interface for image upload and prediction visualization.
- Co-authored a research paper based on AI-driven prenatal screening in healthcare.

Library Management System | Java, MySQL

- Developed a desktop-based system for managing library operations.
- Implemented CRUD functionality for books, students, and borrowing records.
- Designed database schema for efficient data storage and retrieval.
- Improved academic understanding of database systems and application logic.

Waste Management System | Web Development (HTML, CSS, JavaScript, Backend)

- Built a web-based system for managing waste pickup requests and scheduling.
- Developed modules for user registration, complaint submission, and request tracking.
- Created an admin dashboard for managing collectors and operations.
- Focused on solving real-world environmental management problems.

Student Management System | Java, MySQL

- Developed a system to manage student academic records efficiently.
- Implemented full CRUD operations with database integration.
- Enabled record search, update, and deletion functionality.
- Strengthened understanding of database-driven applications.

Responsive Web Dashboard | React.js, HTML, CSS, Bootstrap / Tailwind CSS

- Designed and developed a modern responsive dashboard interface.
- Implemented collapsible sidebar navigation and reusable UI components.
- Focused on responsive design and user experience optimization.
- Improved frontend development and component-based architecture skills.

Date of Birth: 04-08-2005
